FINLAND'S WATER EXPERTISE IS WORLD CLASS

Photo: HSY

The water supply system in Finland is robust, reliable and cost-effective. it functions 24 hours a day, 7 days a week even when there is a power cut.

**RICH IN
WATER,
SMART
IN WATER
KNOWLEDGE**

You can swim and fish in any of the 647 rivers and 187,888 lakes.

You can drink water directly from the tap anywhere.

All of Finland has access to improved water sources and sanitation.

Finland's water sector always ranks high in international comparisons.

Since the early 1900's the responsibility of water supply is shared.

It has been developed by cooperation between a variety of private and municipal organizations.

A male scientist with short brown hair, wearing a blue polo shirt and clear safety glasses with blue frames, is looking intently at a row of laboratory glassware. The glassware includes several graduated cylinders and beakers containing liquids of various colors (yellow, white, brown) and a large beaker with a dark, bubbly liquid. The background is a blurred laboratory setting with blue equipment.
