To the reader

Finland in Figures 2021 compiles up-to-date statistics on Finland and Finns. This publication describes us and the society we live in. Every Finnish person, home, school, workplace, cottage and municipality is included. As individuals we are not visible, but together we form these statistics.

Most of the statistics are based on various registers, and data are also collected with surveys and interviews. You could also get selected for a survey. Then you represent a larger group of Finns. Statistics are made together and each respondent is important to us!

Do you know how many children were born or how many wage and salary earners worked part-time in 2020? How much did the coronavirus impact Finnish residents' leisure trips abroad or going to the cinema? The answers to these and many other questions can be found in this publication.

Immerse yourself in statistics, find new, interesting information and be surprised!
