Fazer Lifestyle Foods – At its best, food delights, nourishes and supports our health, all at the same time. Plant-based foods are quickly gaining market share as customers look for tastes that are good for the body, the mind and the environment. Fazer Lifestyle Foods answers these needs.

Fazer Lifestyle Foods combines foods that enhance well-being with products for those who seek to reduce the environmental strain of global food production. Its offering includes fruity **Froosh** smoothies, Fazer **Yosa** oat products and non-dairy drinks as well as **Frebaco** and **Fazer Alku** oat-based breakfast foods, and oat derivatives for the food, cosmetics and pharmaceuticals industries. The investment in a new factory in Lahti, Finland, which will utilise state-of-the-art technology to produce xylitol from oat hulls – a side stream of the oat milling process – marks a further step on the way towards enhanced sustainability and circular economy through innovation. The works on the site in Lahti have already been started.

Oats <3 Beans

Gold&Green is a radical novelty on your plate. It's not made of soy or wheat gluten. Instead, Gold&Green is made of oats and beans. Oat is the Northern superfood. It has amazing effects on the heart health, blood sugar and digestion. Oat is also one of the most ecological crops in the world. At the end of the fork oats & beans are yin & yang, forming together the perfectly balanced protein and a tender, juicy food structure.

Make my veggie day

Our secret is to collide the pure, clean Nordic oats with some age old Asian production methods. The result is completely new. Our products have approx 30% of good quality protein, combined with good fatty acids and fibers. You can finally say goodbye to the boring minced meat on Mondays, and the tasteless soy strips as the only vegetarian option. Plant based food that satisfies like good food should - it's finally here.

PRODUCTS

1. Plant protein foods based on Nordic oats and beans

SPECIALITY

Accolated Finnish start-up company producing complete plant protein, made ecologically with the Nordic oats & beans. Patented platform.

We are a Finnish company on a mission to produce and develop tasty vegetarian foods from Finnish fava beans. Our products are excellent sources of protein and dietary fibre and a sustainable alternative to soy. Fava Beans are one of the worlds most ancient crops that has been grown in Finland since the Middle Ages. Fava Beans can be seen as a new old food as they have gained publicity as a trendy ingredient in recent years.

Fava Beans are highly nutritious pulses that contain up to 30 % of protein in dry weight. The high protein content is complemented by a fair amount of dietary fibre, slow carbs and B-vitamins. In our products we use the entire bean – including their husks – which increases the fibre content significantly.

All of Verso Food's fava bean products are made in Finland and suitable for vegans. HÄRKIS® is precooked and a perfect alternative to minced meat – all you need to do is warm it up! Verso Fava Bean Granolas can be used as muesli and enjoyed for breakfast or as a snack. Enjoyed with yoghurt or milk – every munch keeps its crunch!

Verso Ground Fava Beans are an alternative vegetable protein source. From soups and stews to pancakes and patties the ground beans are a sustainable alternative to soy.

Utajärvi

Our family mill, the northernmost oat mill in the world, is located in Utajärvi, northern Finland, at the 65th parallel north. It is one of the northernmost areas in the world where oats can be grown.

Good taste is one of the signs of quality; purity is another. For us, gluten-free oats also mean purity since oats are naturally gluten-free. Our brand new oat mill to be completed in 2019 will be one of the rare oat mills to be dedicated exclusively to processing gluten-free pure oats. We want this unique ingredient to remain pure throughout the chain to ensure that it can be enjoyed by as many people as possible as soon as the production starts in spring 2019.

All of our products are gluten-free, and organic versions are also available. Our products are intended as ingredients for food manufacturing companies.

PRODUCTS

Taivalkosken Mylly is located in Southern Ostrobothnia, where farming and food industries have a long tradition. The location allows carefully to select raw materials to ensure they reach highest standards. Taivalkosken Mylly uses also the name West Mills Ltd. All products of Taivalkosken Mylly are produced mainly from Nordic grains that include also organic products and Nordic berries. The grains and berries are pure and natural without E-codes. We have certified ISO 9001:2008 (FIHSK96008A) quality control system and Ecocert natural for cosmetics.

Taivalkosken Mylly produces:

Extruded cereal and berry ingredients for industry, Breakfast cereals TalkMuru, TyrniMuru and Rölli for Finnish retailers. The nutritional content of TalkMuru has been rated the best in Finland.

Taivalkosken Mylly co-operates with local suppliers to provide cereal ingredients. Taivalkosken Mylly is the original production place of all the products. The mill has developed processes, where extruders operate as bioreactors resulting in improved water and oil retention, purity, taste and repetitive behaviour. The process improves also nutritional values in terms of protein, dietary fiber and oil content, when required. The products can include betaglucan and omega3, to which EFSA has supported health claims.

PRODUCTS

1. Cereal and berry ingredients for industrial customers; oat betaglucan, hygienic flours
2. Breakfast cereals

SPECIALITY

Taivalkosken Mylly markets oat betaglucan as extruded non-expanded granules, flour and tailored versions. Extrusion gives structure, easier handling, high water retention and purity.

The FINN CRISP brand was established in 1952, when FINN CRISP thin crisps were launched at the Helsinki Summer Olympic games.

Simple, pure and powerful FINN CRISP captures the essence of Finland for millions of people worldwide who care about eating healthily.

Finland has long traditions in crispbread consumption and crispbreads have been known in every household since the 1800's.

During the heyday of agrarian society, in the western part of Finland, it was traditional to bake bread only twice a year: in the autumn when the crops were new and in the spring, when the fresh water flowed freely in the streams and rivers after the winter. The crispy and nutritious bread was easy to store as it remained delicious for months.

Finn Crisp is produced by Vaasan, part of the Lantmännen Unibake Group. Finn Crisp is being exported to over 40 countries around the world.

PRODUCTS

1. Rye bread and rye snacks; flavored rye snacks

SPECIALITY

The Goodness of Nordic Nature. Products are thin&crispy. Baked with 100% wholegrain, rich in fibre and minerals, no additives, no fat added, no sugar added

Heinola

The history of Pekan Leipä goes back to 1888 when Bakery Manelin was founded in Heinola, Southern Finland. Local baker Pekka Mussalo bought the bakery in 1964 and the name was changed to Pekan Leipä Oy. Nowadays Pekka's son Arto Mussalo runs the business. Our breads and pastries are baked with traditional recipes with the twist of modern flavors. The quality, taste, healthiness and structure of the products are the main criterias guiding our product development.

Pekan Leipä Oy has been exporting organic bread to German market since 2003. The product became so popular that in the year 2008 a separate organic bakery was built in Heinola. In this modern IFS certificated bakery Pekan Leipä combines the traditional Finnish rye baking and the modern techniques.

Pekan Leipä's own brand, Finnbio, includes variety of Frozen Breads and Toasts. Toasts are also available as MAP (Modified Atmosphere Packed). Rye and Oats are widely recognized as part of healthy and balanced dietary. The easiest and most delicious way to ensure your daily intake of fiber is enjoy Finnbio Rye and Oat Breads. Our products are organic, lactose free and rich in fiber.

Pekan Leipä Oy manufactures breads also under private label to several German retail chains and to domestic customers. In 2015 Lidl's Biotrend Bio-Toastbrötchen both Rye and Wheat won DLG's Golden Medal.

PRODUCTS

1. Rye breads mixed with oat and other grains, and other bakery products

FinnSnack (former Ruislandia) is a bakery that brings together healthy ingredients, great flavour and traditional baking techniques. Pure nordic taste, made with care in genuine brick-ovens.

Generational legacy has reached its apex in our 18 meter long brick-ovens, which are further tuned to follow today's ecological requirements. Our ovens have the air-flow and humidity distinct to good brick-ovens, where the oven itself soaks in the moisture exhumed by the bread returning some of the moisture gradually back to the baking product during the process. Our products are baked or roasted twice in the oven – a unique baking process that guarantees crispy texture filled with flavour. For us, taste is everything.

We use only 100% Finnish ingredients. Mellow seabreeze and soft summer sun gives growth to the crops we use to give our products their deep, rich flavour.

Grown in fields far from pollution or traffic, with cold winters giving pests a hard a time, we can safely say our raw-materials are amongst the best and purest in the world. There are cheaper options available, but we want to use the best. And we hope, so do you.

PRODUCTS

1. Rye snacks and baby snacks

SPECIALITY

Rye snacks made from 100% Finnish ingredients using a unique baking process.

The story began in a small home bakery on the Vuohela farm, which is almost 200 years old. Everything was changed when the founder of the company, managing director Pirkko Hämäläinen, was diagnosed with celiac disease. Pirkko was shocked when she discovered the extent to which gluten-free products lacked any taste. She decided to do something about it, beginning the development process of gluten-free products and focusing on the best raw materials, delicious recipes and the traditional baker's craft. "When you do something, make sure it's absolutely the very best it can be."

That was the beginning of a success story. Today, Vuohelan Herkku is one of the most beloved gluten-free brands in Finland. Our products go well with a broad range of diets. Vuohelan herkku is the leading producer of gluten-free fresh products in Finland.

Suomusjärvi

Spelt (*Triticum spelta*) is an approximately 9,000 years old plant; one of the first grains cultivated by humans. Spelt can be used for all baking and cooking. It gives a nutty, aromatic and full flavour to pastry and food. The most significant nutritional property of spelt is its **rich protein content**. Whole spelt grain also contains **plenty of fibre**. According to a study carried out in Australia, spelt contains less specific short-chained carbohydrates (**so-called FODMAP carbohydrates**) than other grain, which reduces abdominal swelling and pain experienced by some people.

The spelt products from Birkkala Farm are authentic and original spelt. Our products are available for both **organic** and with the **produce of Finland** label. Spelt flour from Birkkala is grained in our own farm in a **stone mill**. Our spelt flour are milled in a stone mill that mills the grain gently, so that the vitamins and minerals are not damaged. Our product are available in all well-stocked grocery stores.

PRODUCTS

1. Spelt whole grains, wholemeal spelt flakes, pearled spelt
2. Semolina spelt flour, spelt wholemeal flour, spelt white flour
